❓ SUMMARY

I am a talented 25 years old graduate software engineer with a strong academic background and a startup creation experience.
I love working in a team and collaborate with others to build awesome products. My communication skills make me able to work with heterogeneous teams: marketers, designers, engineers...
I also enjoy solving real technical problems and I always keep in mind the notions of productivity, teamwork and final user usage.

✈ RELEVANT EXPERIENCE

2011-2013 **Co-founder & COO – Plixee**

Creation of a web startup offering a collaborative project management tool for the small and mid-sized businesses. The company was backed up by SEINARI business incubator and OSEO.
With the rest of the team, I worked on:
• Backend architecture and development
• Frontend development
• iOS development
• Definition of the business model, writing of the business plan
• Commercialization of the product, meeting with clients, press and partners

My technical, organizational and relational skills made me able to create the link between business and technology, to help the team to get things done and create a great product.

Technologies: Java, Spring, Maven, Hibernate, PostgreSQL, HTML/CSS, Coffeescript, jQuery, Backbone.js, Objective-C, Git, Linux servers

2011 **Project leader – INSA Rouen & Orange Labs**

Part-time project (25 hours/week) which consisted in studying and creating an Android application in order to manage, process and access a user's geo-localized information. This research-oriented project was certified ISO 9001:2008 (Quality Management).

I led the team to create a real product while taking into account the client's needs and building a friendly atmosphere where everyone could bring its ideas and innovate. I have been able to quickly learn new technologies in order to solve the technical problems we were facing.

Technologies: Java, Android, PostgreSQL, PostGIS, SVN, XSLT

Summer 2010 **Internship: iPhone developper – IP Multimédia**

Conception, design and development of severals iPhone applications and APIs. The main application aimed at connecting a user to a social and dating network and enable him to exchange messages with the other members.

Technologies: HTML/CSS, PHP, Objective-C, XML

🎓 EDUCATION

2006-2012 **Engineer's degree — Computer science**

National Institute of Applied Sciences (INSA) of Rouen, France
Information systems architecture department (http://asi.insa-rouen.fr)
INSA is one of the French Grandes Écoles: http://www.insa-rouen.fr

Activities:
• Member of the school board
• President of the students union
• Community manager of the school

🔧 SKILLS

Programming
• Java/JEE & Spring ★★★
• HTML/CSS ★★★
• Javascript/Coffeescript ★★☆
• Python ★★☆
• Android ★☆☆
• iOS/Objective-C ★☆☆

I also worked with Maven, Ruby, XML, XSLT, PHP, Hibernate, databases (MongoDB, redis, PostgreSQL, MSQL), bash, PostGIS, etc.

Teamwork & Projects
• Git / SVN ★★★
• Agile methods ★★☆
• ISO 9001 ★★★

Operating systems
• Mac OS ★★★
• Linux ★★☆
• Windows ★☆☆

Personal skills
• Experience managing a team and building real products

• Proven ability to handle business and technical tasks

• Passion for keeping up with emerging technologies

• Flexibility and adaptability

• Aptitude and will to quickly learn new technologies, workflows and cultures

• Capacity to communicate/explain complex issues to a large range of audiences at all levels

🚩 LANGUAGES

• **French:** native proficiency
• **English:** professional working proficiency
• **Spanish:** elementary proficiency
